

## RealView™ Immersive Interview

# THE NEW BREAKTHROUGH INTERVIEW

**First there were traditional interviews. Then virtual interviews. Now there's RealView!**

Why rely on hypothetical answers to hypothetical interview questions? Now you can see firsthand how candidates handle real-life challenges your employees face on the job every day.

An engaging blend of simulation and interview technologies, RealView immerses candidates in authentic workplace situations. In each situation, candidates record their interactions as they handle the most critical situations that drive success for your business.

Each recorded interaction is immediately available for playback and rating. Information is saved with the candidate's record and is easily shared online with other key decision makers.

RealView is available to candidates 24/7 from any smart device and is designed for seamless integration with your current screening process.

Contact us today for your **FREE** demo.
